Section VI
Symposium

Organized by:

Sponsored by

CIGR – SECTION 6

CIGR Section VI (Postharvest Technology and Process Engineering) deals with the engineering principles and technologies in postharvest and processing of agri-food products. It is devoted to follow the trends, promote the advancement and enhance the dissemination and transfer of technology in postharvest and processing at a global scale.

To fulfil better its missions, Section VI of CIGR is organizing the 6th International Technical Symposium: «Toward a Sustainable Food Chain» in Nantes, France.

The event follows 5 previous similar events held in each continent, demonstrating the international profile of CIGR: China (2004), Poland (2006), Italy (2007), Brazil (2008), and Germany (2009). As previous in Symposiums, selected papers presented at this Symposium will be published in a special issue of Food and Bioprocess Technology - An International Journal published by Springer and indexed by SCI.
